SUMMARY

MERN Full Stack and Flutter Developer with 5+ years of experience building scalable web and mobile applications. Skilled in transforming ideas into user-friendly products, enhancing existing systems, and adapting to new technologies across frontend, backend, mobile, and DevOps. Passionate about solving real-world problems, taking on new challenges, and delivering impactful digital solutions.

EXPERIENCE

Senior Software Engineer-Technical

iSpace

January 2026 - Present, Hyderabad, Telangana

Client - KornFerry

- Contributed to maintenance and enhancement tasks for a full-stack web application using **React.js**, **NestJS**, and **PostgreSQL**.
- Resolved UI and backend bug fixes, improving application stability and user experience.
- Gained exposure to **Micro Frontend** architecture and contributed to minor feature updates within a modular frontend setup.

Senior Product Developer

Inncircles

April 2024 - December 2025, Hyderabad, Telangana

Client - ASBL

- Built and launched a **React.js** dashboard application for gated communities, contributing from initial project setup through deployment and post-launch enhancements.
- Developed and maintained reusable, modular React components, improving code consistency and accelerating future feature development.
- Contributed to backend development tasks using **Node.js**, supporting feature implementation and API integrations.
- Developed and enhanced a resident-facing **Flutter** mobile application, delivering impactful features across **Android** and **iOS** platforms.
- Collaborated with cross-functional teams during development, testing, and release cycles to ensure smooth project delivery.

Software Engineer

Spreadsheet.com

January 2021 - March 2024, Hyderabad, Telangana

- Developed responsive and scalable web interfaces using **MERN** stack, while utilizing **Docker** to streamline local development and deployment workflows.
- Delivered key product features such as an improved onboarding flow and Named Ranges, enhancing user adoption and overall platform engagement.
- Contributed to a comprehensive UI revamp by improving navigation, visual consistency, and user experience across the platform.
- Supported development of dashboards for revenue tracking and business insights using **React.js** and **Flask (Python)**.
- Played a key role in product growth from beta stage to over \$120K ARR through continuous feature delivery and technical enhancements.
- Built and enhanced core mobile application features using **Flutter**, extending product accessibility across **iOS** and **Android** platforms.
- Managed **CI/CD** pipelines and assisted with **DevOps** processes to improve release efficiency and deployment reliability.
- Executed **MongoDB migration** initiatives, consolidating multiple databases into a shared architecture using **Python** to reduce infrastructure costs and simplify maintenance.

Web developer

Freelance

January 2019 - December 2020, Kakinada, Andhra Pradesh

- Developed a location tracking application using **JavaScript**, **Map APIs**, and **Firebase** to monitor user locations and calculate distances traveled in real time.
- Built a **mobile application** with offline-first functionality to capture location data at scheduled intervals and automatically sync stored data once network connectivity restored.
- Designed and delivered web solutions for local saree businesses, creating digital storefronts to effectively showcase products and improve online presence.
- Created a user-friendly web application for college faculty to manage and display personal profiles, class schedules, and related information.

SKILLS

Web Development: React JS, Node JS, JavaScript, MongoDB, Firebase, SQL, JQuery, Git/Github/Bitbucket

App Development: Flutter, Bloc, Dart, Firestore, RESTful API integration

Dev Ops: Docker, Jenkins, Python, Linux, Shell Scripting

PROJECT

AI Pal (OpenAI app)

github.com/udaykumar-m/OpenAI-App

- Developed a **Flutter** application that provides daily random quotes on selected topics, including shareable content with meanings, usage examples, Instagram captions, and tweet generation based on user input.
- Implemented **Firebase integration** to save user data using mobile unique IDs, enabling data storage **without requiring login**.
- Achieved rapid adoption with nearly **100 users within the first week** of publishing on the Play Store.

AI Chrome Extension

github.com/udaykumar-m/chromeExtension

- Developed a multifunctional AI Chrome extension, "AI Pal," that delivers jokes upon opening and provides word definitions with usage examples upon selection.
- Integrated features to generate Instagram and Twitter captions, enhancing user engagement and experience.
- Achieved **258 installs within two months of launch**, demonstrating strong user engagement.

Tune Up

Under Development • github.com/udaykumar-m/TuneUp

- Developed Tune Up, a personal **music-sharing application** centered on collaborative and synchronized listening experiences.
- Built a music player supporting playback from local device storage and integrated the **YouTube API** for song search and online streaming.
- Implemented real-time shared listening rooms using **WebRTC**, enabling multiple users to connect, share, and enjoy music together.

INVOLVEMENT

Maintainer/Developer

IIIT, Hyderabad • Swecha Non-Profit Organization • undefined -

- Fixed bugs and completed a full UI revamp on a React application for a nonprofit organization.
- Helped build a Flutter application from scratch to support the nonprofit's mission.
- Collaborated with team members to improve usability and ensure a smooth experience for users.

EDUCATION

BTech in Computer Science Engineering

Jawaharlal Nehru Science Engineering • Kakinada • 2020

Diploma in Computer Science

Andhra Polytechnic • Kakinada • 2017
